

## St. Mary Early Learning Center

Your child will develop academic, physical and social skills while enjoying the learning process.

They will be given opportunities to be creative, make independent decisions, and grow their self-confidence.

### Transitional Kindergarten

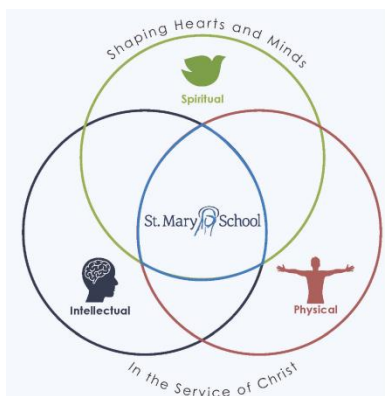

This program is intended for children who would benefit from another year of growth before entering Kindergarten. Your child will use hands-on activities so they can experience math, science, music, and literacy in a fun filled environment. We emphasize learning in socialization skills, sharing and getting along with others in a group through the creative use of activity centers. Children learn writing their name the kindergarten way, numbers, letters, sounds, sight words, Spanish, and religion.
